

PowerizeD

Digitalization of Power Electronic Applications within Key Technology Value Chains

We are happy to share that the PowerizeD project's presence at the Chips JU Walk of Fame event in Brussels was a success!

This significant achievement is a testament to the collective efforts of our 61 partners and the project's commitment to innovation & sustainability.

Connecting with our partners and industry experts during the event was a true pleasure, as we engaged in fruitful discussions, sought collaborative opportunities, and explored potential synergies. It was inspiring to witness the expertise of Jochen Koszescha, the coordinator of the PowerizeD project, as he showcased the project to fellow participants, highlighting its innovative features & revolutionary impact.

Jochen Koszescha, PowerizeD project coordinator, shared valuable insights during his presentation at Walk of Fame Chips JU. Francisco Ignacio Serradilla, Senior Programme Officer & Huascar Espinoza, Senior Programme Officer, were also present at this presentation.

The event provided us with a valuable platform to showcase our groundbreaking innovations and cutting-edge technologies. We had the opportunity to demonstrate how our solutions are revolutionizing the energy industry and shaping the future of semiconductor advancements. The positive feedback and interest we received from industry leaders further validated the impact and potential of the PowerizeD project.

Moreover, our participation at the Chips JU Walk of Fame event facilitated invaluable networking opportunities. By staying at the forefront of semiconductor advancements, we are well-positioned to continue driving innovation, sustainability, and positive change within the energy sector.
